A New Route 13

continued from front page

provided at this hearing. Make sure we have a contact name, address, phone number and e-mail address so we can get back to you if we have further questions.

Following this public hearing, we will review all written comments and consider the points you made. We may make changes to the design based on information you provided.

Once we have received all comments and amended our plans, we will present the preliminary design to the Missouri Highways and Transportation Commission for approval. As part of that presentation, we will include your comments and how we've responded.

Once the Commission reviews and acts to either further amend or approve them, we can then begin work on right of way and construction plans.

When MoDOT has funds available, we will seek bids, select a contractor and complete the new Route 13 highway.

Still Have Questions?

For more information on this project, call Transportation Project Manager Wes Moore at 816-387-2499.

A New Route 13

North Leg of the East Loop

Traffic congestion is accompanying rapid development in the Warrensburg area. Route 13 through the heart of town is crowded. MoDOT is doing something about it.

A new 12-mile-long Route 13 is moving forward, curving around the east side of Warrensburg to provide highway travelers and local motorists relief from congestion.

The plan for the north leg of the Route 13 East Loop relocates Route 13 between Route V and Route 50 near Route HH. Existing Route 13 would remain in place as a business route. At this time, funding has not yet been allocated for this project.

The north leg is part of overall improvements to the Route 13 corridor, including the relocation of Route 13 between Route 50 and south of Route DD, scheduled to begin construction in late 2008.

The new Route 13 will be built as a two-lane highway. Enough additional right of way will be acquired to eventually add two more lanes, making Route 13 a divided four-lane highway.

Tonight's public hearing is a chance for motorists, area residents and property owners to see the plans for the north leg of the new Route 13. We encourage you to ask questions of MoDOT's engineers, right-of-way professionals and designers.

We want to hear your comments, too. The best way to make sure we've received your input is for you to fill out the comment cards
