The Missouri Department of Transportation (MoDOT) District 8 is in the process of soliciting competitive bids for supplying **native seeding and erosion control**. Bids shall be mailed to MoDOT General Services, 3025 E. Kearney, Springfield, MO 65803 and will be opened at this address on January 9, 2007 at 2:00 p.m local time.

All pages of this bid must be completed and returned to the buyer listed above for the bid to be considered responsive. Bids are to be returned in a sealed envelope plainly marked "Bid for Native Seeding and Erosion Control".

## SCOPE OF WORK

### GENERAL REQUIREMENTS:

- A. Contractor will apply well-decomposed organic compost medium to a two (2) inch depth for soil improvement and to provide seed cover for planting areas in various locations Mo. Route 13,76 and 413 in Stone County, in a manner consistent with professional application practices and to the complete satisfaction of MoDOT. The areas are concentrated around the interchange of 76 and 413, and the interchange of 76 and 13. See project plan sheets.
- B. MoDOT will provide all grass and wildflower forb seed to blend with compost during application.
- C. Contractor shall supply all compost material per standard specifications.
- D. Contractor shall apply compost and seed mixture using a pneumatic blower device.

### PROJECT LOCATIONS

- A. There will be various work locations within the project, hereinafter referred to as “Area” for this contract.
- B. Total estimated coverage is 3.69 acres = 160,810 square feet.
- C. Project sign maps indicate general area of applications. See project plan sheets.
- D. Specific area location descriptions. See project plan sheets.

### SPECIFIC REQUIREMENTS

- A. Contractor shall apply compost and seed mixture using a pneumatic blower device or blower truck. Equipment used must comply with this specification and the vehicles must have a calibrated seeder attachment for ‘living blanket’ application that requires seeding.
- B. Areas listed are measured for approximate square footage of coverage area. In the event the square footage estimates do not provide full coverage of intended area, increases in square foot coverage will be determined by funding availability.
- C. Not all planting areas were designed to provide 100% coverage. Some of the planting areas will still have bare areas remaining that are to be considered outside of this job scope. This would be top edges, side edges and areas that feather out into existing plant cover where and there is adequate planting existing to prevent erosion.
- D. Areas that have existing patches of vegetation are to remain and will be considered as non-contributing to the square foot calculations.
- E. The majority of the locations are on slopes facing the travel way and behind the ditch. Surfaces encountered may be rilled or in early stages of erosion. Application of the material onto the surface is “as is” with the rills. Rocky conditions are present on some slopes. **Rock outcroppings greater than 1 1/2 square feet in size should not be covered with the material.**

**F. Application guidelines:**

Contractor shall provide MoDOT with proof that 2” compost has been applied. This rate equals approximately 288 cubic yards of compost material per acre of application area. Contractor will supply ample evidence showing this amount of material has been effectively placed (i.e., truck load tickets)

144” per square foot x 2” depth of compost = 288” per square foot of compost

1 cubic yard of compost = 46656 square foot divide by 288” = 162 square foot coverage per cubic yard.

Square feet of planting site divided by 162 square feet = cubic yards required for the location.

**COMPOST SOIL MATERIAL SPECIFICATIONS**

**A.** Contractor shall supply all compost material.

**B.** Compost soil shall be free of weed seed and foreign material such as trash or materials deemed toxic to plants.

**C. MoDOT Standard Specification**

The material shall be free produced from decayed organic yard waste. Yard waste may include leaves, grass clippings, tree limbs, Christmas trees and other yard garden vegetation. The material shall have gone through a decomposition process from a compost site approved by the engineer and shall have decomposed to the point that it no longer resembles the individual components from which it was derived. The compost shall be dark brown to black in color.

**GRASS SEEDS & WILDFLOWER FORB SEED**

**A.** MoDOT shall supply all seed material.

**B.** Contractor may pick up seed material at MoDOT Roadside facility located at 2455 N. Mayfair, Springfield, MO prior to the start of the project.

**C.** The seed-dispensing compartment shall be clean and free of all previous seed source.

**WORK ZONE TRAFFIC MANAGEMENT PLAN**

**A.** Work zone traffic management shall be in accordance with applicable portions of the Standard Specifications, and specifically as follows.

3. The project contact shall be notified as soon as practical of any postponement due to weather, material or other delay.

5. No lane closures shall take place for this service.

#### **C. Work Hour Restrictions.**

3. All personnel shall wear reflective safety vests while performing work.
4. All material, equipment and labor costs associated with compliance with traffic control shall be included in the square foot price for native seed and erosion control.

### **EMERGENCY PROVISIONS AND INCIDENT MANAGEMENT**

**A.** The contractor shall have communications equipment on the construction site or immediate access to other communication systems to request assistance from the police or other emergency agencies for incident management. In case of traffic accidents or the need for police to direct or restore traffic flow through the job site, the contractor shall notify police or other emergency agencies immediately as needed. The project contact shall also be notified when the contractor requests emergency assistance.

In the event the successful Contractor fails to deliver the material within the time specified, the Department and the public will sustain damages because of such delay in delivery, the exact extent of which would be difficult to ascertain, and in order to liquidate such damage in advance it is agreed that the **sum of two-hundred dollars (\$200.00) per day, per item**, for each assessable calendar day on which the delivery has not been completed, is reasonable and the best estimate which the parties can arrive at as liquidated damages, and it is therefore agreed that said amount will be withheld from payments due the Contractor or otherwise collected from the Contractor as liquidated damages.
