

The public may attend either meeting at any time during the advertised hours. For information or accessibility accommodations, call 1-888-ASK-MoDOT (275-6636) or TDD 1-800-735-2966 for the hearing impaired.

Open House, 4-7 p.m.

Thursday, July 26
Cowan Civic Center
500 East Elm St.
Lebanon, MO

Tuesday, July 24
Lake Career and
Technical Center
269 Dare Blvd.
Camdenton, MO

Public Meetings Scheduled

Missouri Department of Transportation
Summer 2007

New Missouri Route 5, Camdenton — Lebanon

Shared Four-Lane Highway

Between Route 7 in Camden Co. and Lebanon in Laclede Co.

Highlights

- Shared-four lane highway to improve safety and traffic flow
- Current traffic volume – Approximately 8,000 vehicles per day
- Project length – 18 miles
- Miles of passing lanes—Approximately 16 miles
- Construction cost – \$44 million
- Construction schedule – Work begins summer 2008 and completed mid-2010

What's Being Planned — A shared four-lane highway is being planned for 18 miles of Route 5 in Camden and Laclede counties to improve safety and to better accommodate increasing traffic. This innovative highway design is the first project of its kind to be constructed in Missouri.

The Improvement — A shared four-lane highway consists of alternating passing lanes along a conventional two-lane highway to provide motorists with periodic opportunities to pass other vehicles without having to drive in the opposing lane. The project will relocate eight miles of Route 5 from just north of Route 7 near Camdenton to south of the Laclede/Camden County line. Additional passing lanes will be added to the remaining 10 mile section of existing Route 5, between the Laclede/Camden County line and the City of Lebanon.

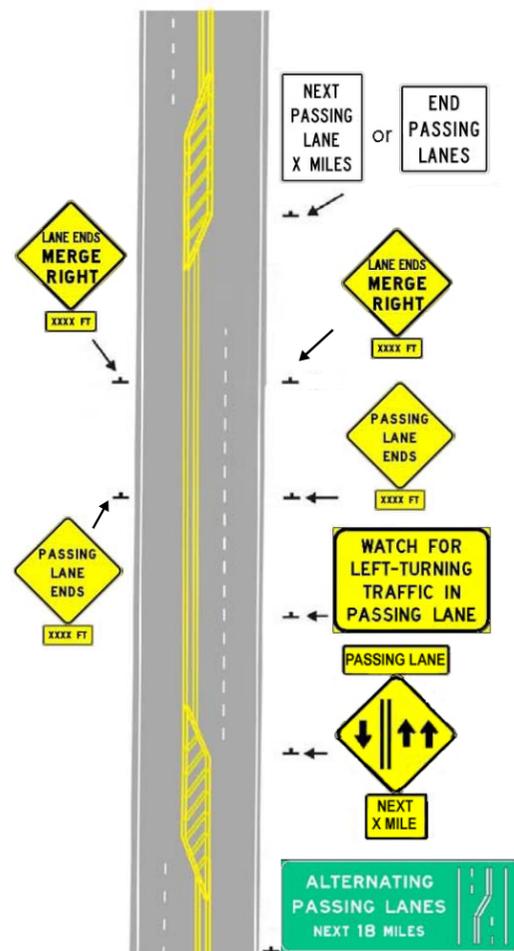

When The Improvement Will Happen — Construction is planned to begin summer 2008 and be completed in mid-2010.

What's Next — Highway designers are working on the project and public information meetings are scheduled in July. (See back page for meeting information.)

What It Will Look Like — The graphic on the inside of this brochure provides an example of how the Route 5 project might look.

What Property Will Be Acquired for the Improvement — Property will need to be acquired to construct the northern portion of the project on the new alignment. Right of way acquisitions are currently ongoing.

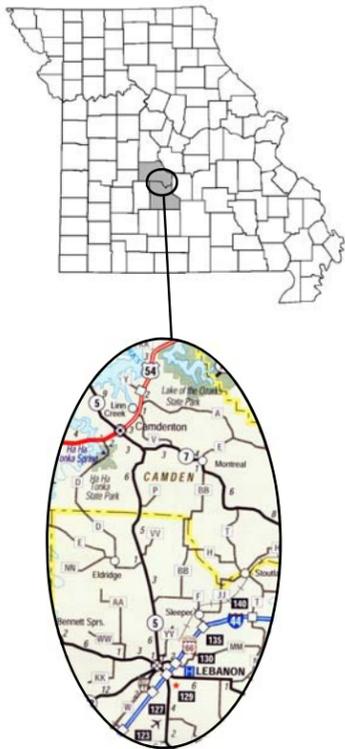

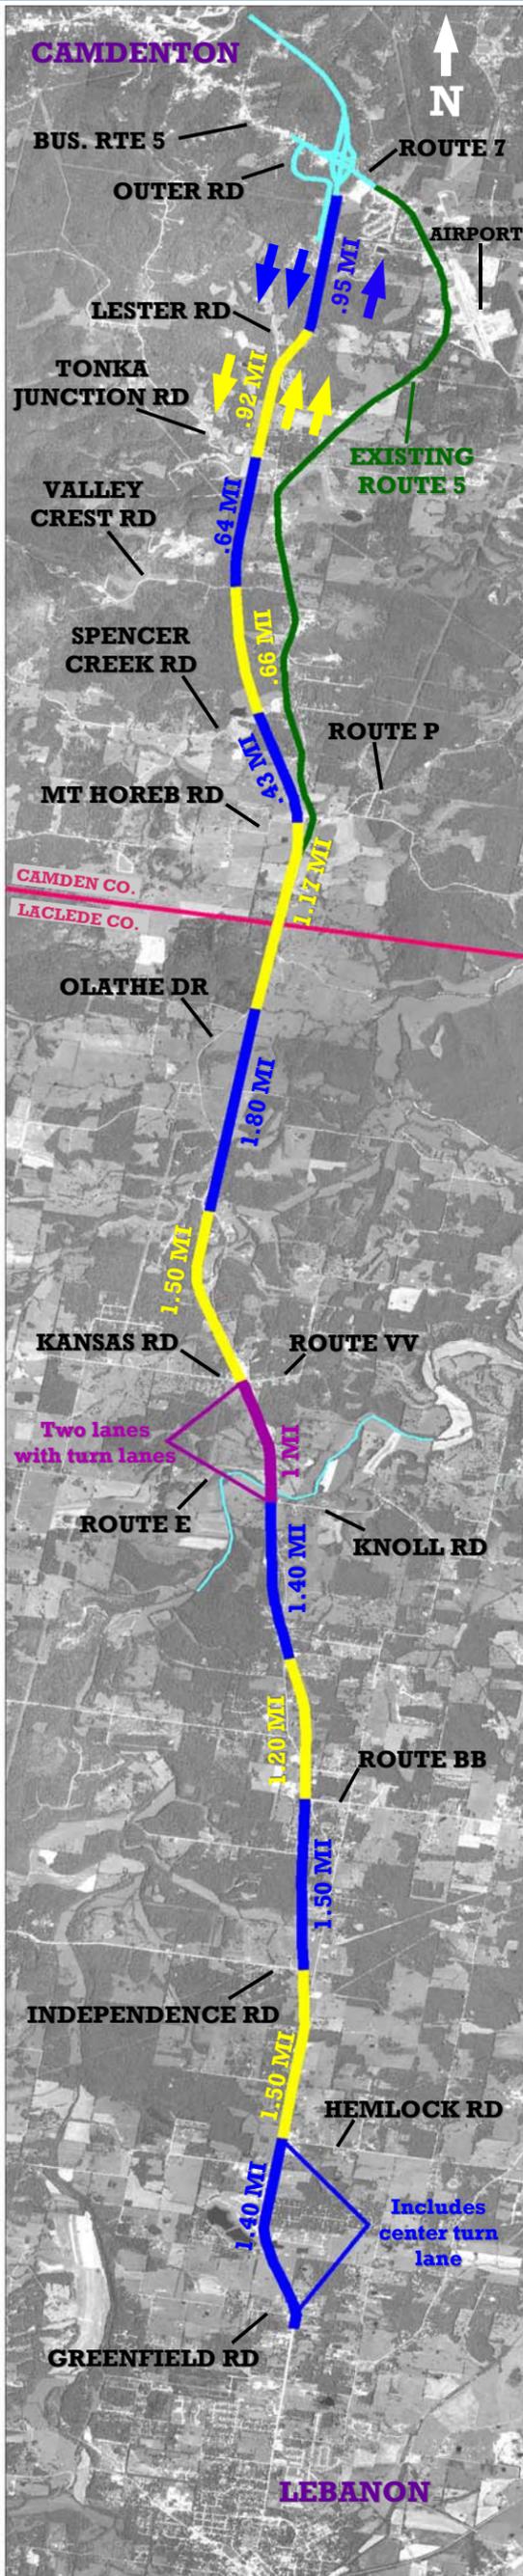

What It Looks Like

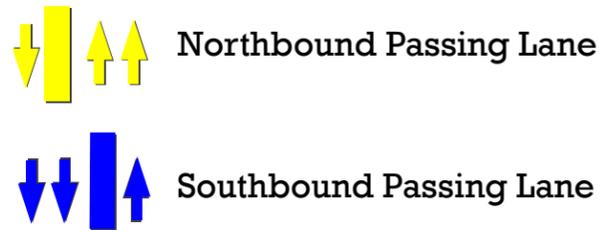

Shared Four-Lane Highway

North End of Project at Route 7 near Camdenton

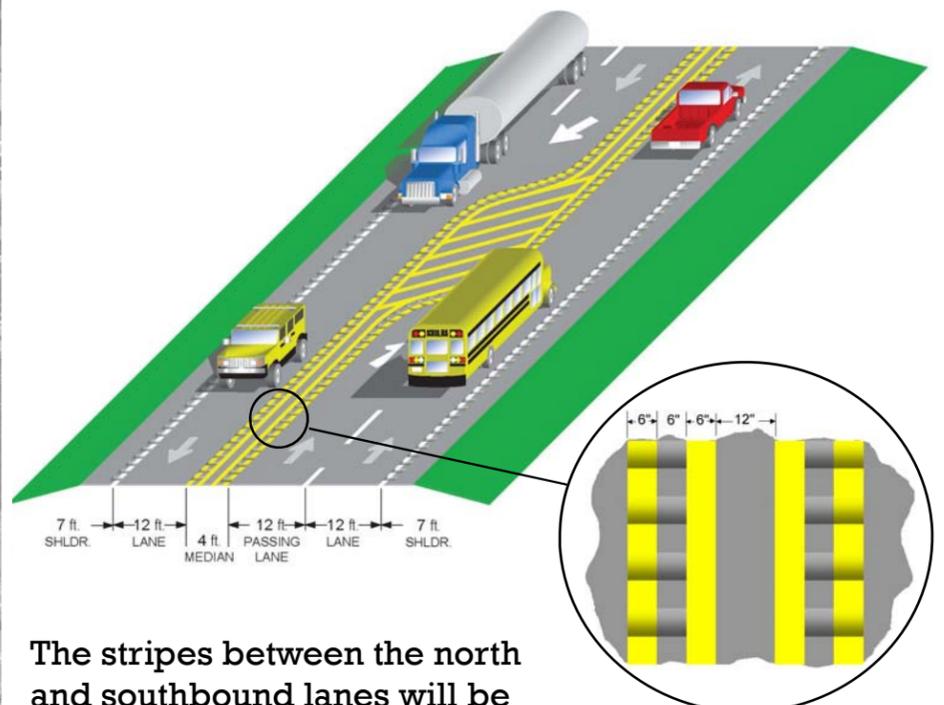

South End of Project at Greenfield Road near Lebanon

Drawings and maps not to scale.

Median Rumble Stripes

The stripes between the north and southbound lanes will be placed over milled depressions in the pavement called **rumbles**. An audible noise and vibration alerts drivers when the vehicle tires move over the rumbles. These **rumble stripes** will be used along the shared four-lane highway to encourage motorists to remain safely in their lanes.
