

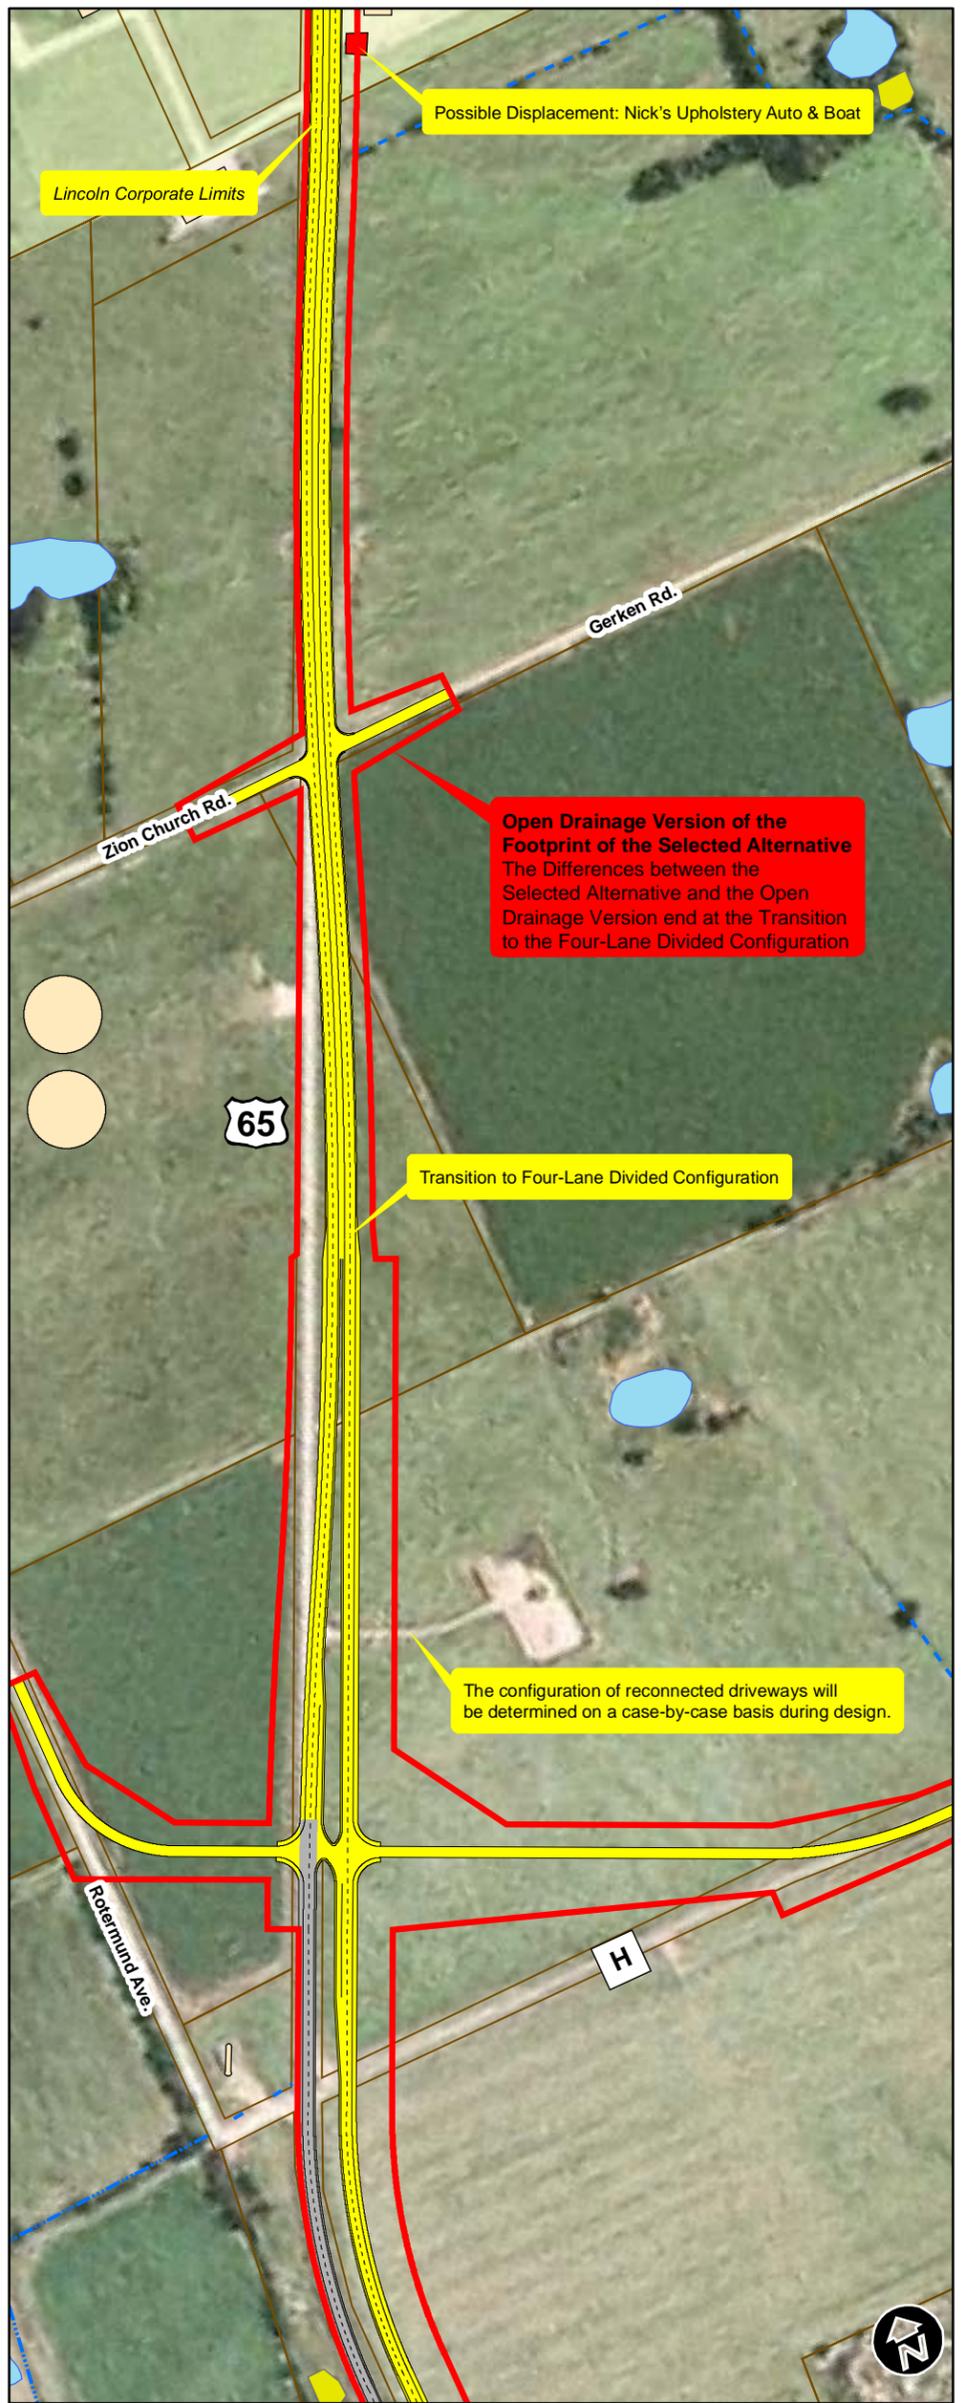

## Exhibit IV-1D: Selected Alternative Impacts Map Route 65 (J5P0892)

### Legend

Ephemeral Stream	City Limits	FEMA Floodplain Zone A (100-Year Floodplain)	Anticipated Right-of-Way Acquisition
Intermittent Stream	Buildings	Parcels	
Perennial Stream	Displaced Buildings	Existing Pavement Structure	
Footprint of the Selected Alternative	Pond and Lakes	New Pavement Structure	
Matchlines	Wetlands	Bridges	

Scale (@ 11" x 17"): 1" = 400'

## Exhibit IV-1Da: Impact Map For Open Drainage Version of Selected Alternative Route 65 (J5P0892)

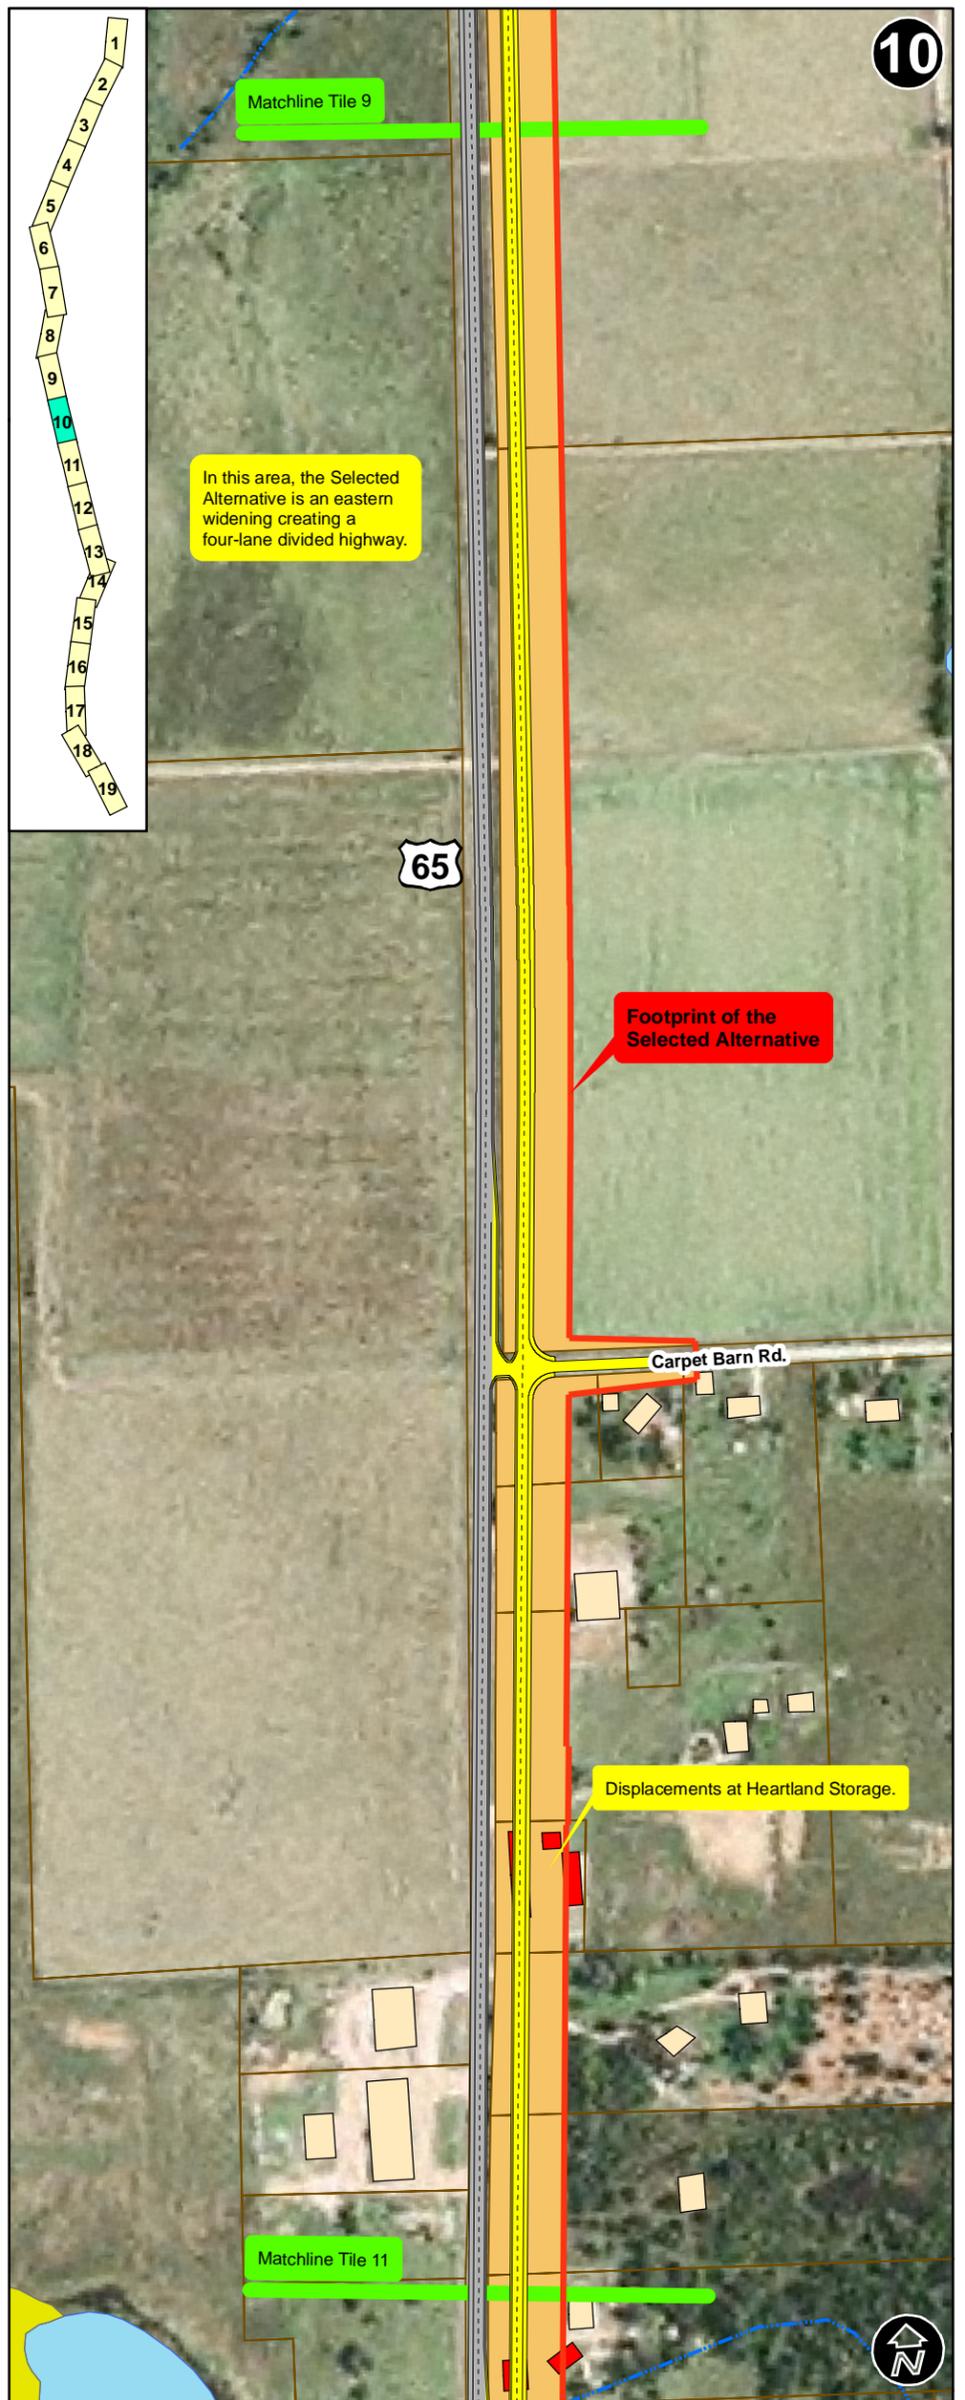

### Legend

Ephemeral Stream	Buildings	Existing Pavement Structure
Intermittent Stream	Displaced Buildings	New Pavement Structure
Perennial Stream	Pond and Lakes	Bridges
LT-E Impact Boundary	Wetlands	Anticipated Right-of-Way Acquisition
City Limits	Parcels	

*This exhibit summarizes the impacts associated with a version of the selected alternative that incorporates an open ditch drainage configuration within Lincoln. The selected alternative uses a curb and gutter configuration through Lincoln. Only if an enclosed drainage system cannot be designed will this open ditch drainage alternative be used. This alternative would widen Route 65 to the east; utilizing the same five-lane, undivided, urban cross-section with an open drainage ditch along the roadway's edge. Most other aspects of the selected alternative would remain unchanged.*

Scale (@ 11" x 17"): 1" = 400'
