

# East Columbia EIS: Selected Alternative

Depicted footprint represents the area cleared in the Environmental Impact Statement. This does not necessarily reflect the ultimate right-of-way required to construct the project.

**BALLENGER ROAD EXTENSION**  
 The Ballenger Road Extension will be developed as a local project. For planning and impact evaluation purposes it is depicted as a two lane roadway. The actual design is subject to modification based on future funding constraints and/or practical design considerations.

**ROUTE 740 EXTENSION**  
 Stadium Boulevard is planned to be an expressway. For planning and impact evaluation purposes it is depicted as a limited access four lane divided highway. The actual design is subject to modification based on future funding constraints and/or practical design considerations.

**ROUTE WW IMPROVEMENTS**  
 Route WW is planned to be a major arterial west of the Route 740 extension and a minor arterial east of the Route 740 extension. For planning and impact evaluation purposes it is depicted as a four lane roadway with a center turn lane, driveway access and at grade intersections. The actual design is subject to modification based on future funding constraints and/or practical design considerations.
