

Kingshighway/Mount Auburn **INTERSECTION IMPROVEMENTS**

The project will include increasing capacity and improving traffic signals at the intersection of Kingshighway and Mount Auburn Road. Dual left turn lanes will be added from Mount Auburn to Kingshighway, from Kingshighway to Lexington Ave. and from Lexington Ave. to Kingshighway. Additionally, a dedicated right turn lane will be added from Kingshighway to Lexington Ave.

How will the project benefit the traveling public?

By adding additional lanes, the delay of these turning movements will be reduced and traffic can move more steadily through the intersection.

What is the timeline for this project?

If the project is awarded in January 2013, improvements could begin as early as spring 2013 with completion by the end of the year.

As construction is underway, how will traffic be impacted?

As construction is underway, traffic will be flagger controlled at times with minimal delays.
