To: All Users of the MoDOT Standard Specification Book

Re: Performance Specifications Review

The conversion of MoDOT's construction specification book to performance-type standards has been completed and is now ready for a final review and comment period. Multi-discipline teams consisting of MoDOT personnel and representation from general and specialty contractors, suppliers, and fabricators developed the current draft specifications. The specifications were further refined through MoDOT's Engineering Policy Process resulting in the present draft document.

Paper or "hard" copies will not be provided due to the large size of the document. Electronic versions of the individual sections can be accessed and downloaded in Microsoft Word format on MoDOT's website at <http://www.modot.state.mo.us/design/specbook/perffiles.htm> under the heading "For Industry Review". Please note that section references have not been checked and/or verified, as that task will be completed after all comments have been received.

We are asking for the industry, both external and internal, to review the draft copy and return any comments, **by February 5, 2004**. We ask that all comments be returned in written form, standard mail or email, referencing the specific subsection number. (e.g.: Section 102.3.4) All comments/questions should be forwarded directly to either Bruce Green (Robert.Green@modot.mo.gov) or Kirsten Munck (Kirsten.Munck@modot.mo.gov) or mailed in care of MoDOT at the address listed above on the letterhead.
